

Dear licensed jumper,

Skydiving in Germany is under increasing pressure from multiple directions. In order for all of us to continue practicing our sport in the future, we need effective representation in the sports and general political environment. Effective representation can only be achieved through an association with many members and a corresponding contribution, as lobbying also involves financial costs. Skydivers without association membership contribute nothing to the future of our sport but benefit from the work and membership fees of others.

At GoJump, we believe that athletes form a solidarity community, and everyone who wants to enjoy our beautiful sport should contribute. Therefore, starting this season, skydiving in Gransee is only possible with proper membership in one of the German associations (DFV e.V. or DAeC e.V.).

If you do not already have such membership, there is no obstacle to jumping on the same day. Membership in the German Parachute Association e.V. can be obtained on-site at our manifest in two ways:

- Joining our local club, the Skydiving Community Berlin-Gransee e.V.
- Obtaining direct membership in the German Parachute Association e.V.

After filling out the corresponding membership application, which we will then forward, you can manifest immediately.
